

# Forest Insect & Disease Management

Report No.  
79-3-38

## AERIAL DETECTION SURVEY OF FOREST INSECT AND DISEASE ACTIVITY, UWHARRIE NATIONAL FOREST

LAND OWNERSHIP OR SURVEY AREA: **Uwharrie National Forest**

STATE: **North Carolina**

AREA WITHIN SURVEY BOUNDARY: **220,202 Acres**

PERCENT COVERAGE: **50%**

DATE: **September 12, 1979**

AIRCRAFT: **Cessna 210**

CREW: **B.I. Hammond, T.P. Russell, W.A. Carothers**

REPORT PREPARED BY: **B.I. Hammond**

### SURVEY OBJECTIVES

To detect the presence of forest insects or diseases adversely affecting the Uwharrie National Forest.

### SURVEY RESULTS & CONCLUSIONS

No serious forest insect or disease activity was detected on the Uwharrie National Forest. The results of this survey indicate that southern pine beetle activity is at a very low level. However, field surveillance by National Forest personnel should continue and any increase in insect or disease activity should be reported.
